KWC DYE PRO

DISCOVER THE NEW COLOR STANDARD

↘ **PRO COLOR. PRO PROCESSING. PRO PRICE.**

Small pastilles, great effect. Hardly distinguishable from the outside, but our new pastille has it all. Color-intensive like never before and cost-efficient like never before. But one thing remains the same: In contrast to conventional flakes, each pastille contains exactly the same amount of color. This helps you to easily and accurately reproduce colors. And if you use our new and incredibly efficient software Chameleon, color adjustments will be as easy as child's play.

Can I simply switch to KWC DYE PRO?

Sure. The satisfaction of our customers is the focus of everything we develop. Our colors are easy to mix thanks to their purity and precision in the manufacturing process. This is how we ensure that you as our customer always get the desired color-shade. It doesn't matter whether it is an existing color, or a new project. Our software Chameleon and our laboratory are at your side with help and advice to support the implementation. On the phone, by e-mail/chat or also personally locally.

What's so great about processing KWC DYE PRO?

Thanks to its special processing during the production of the pastilles, we ensure optimum melting behavior. Give it a try - you will notice that no solid dye dissolves faster at the same temperature and ensures the best possible color experience!

Why do I save money by using KWC DYE PRO?

The efficiency of dyes is characterized by a variety of features. Low working temperatures reduce electricity costs. High color strength saves material input. Self-mixing saves storage costs (no obsolete colors) and high prices for ready-to-use colors especially with light shades. You would like to test all three advantages? Try KWC DYE PRO! The best combined in one pastille!

Why is Chameleon so good?

Because our team of experts is very familiar with the color world of candles. We work out recipes in record time, give processing recommendations and make sure that our colors do what they are supposed to do: To enable simple processing and trouble-free working. Chameleon, our recipe database delivers real-time recipes.

Do I get direct help from KAISER when I need it?

YES! Because we are there for our customers. With our agencies and branch offices worldwide we can guarantee help on every continent on Earth. We support you with all matters. Call us, write us on WhatsApp, WeChat, Facebook, or send a message to service@kaiser-lacke.de
